RNS Shipment JSON Reference Manual Data Section: 1.1

Name: data

Full Path: rnsShipment.data
Type: String Value

Is Required?:

Minimum Length:

8

Maximum Length:
20

JSON Reference Data: https://borderconnect.com/data/data-types.json

Sample JSON:

"data": "RNS_SHIPMENT"

- Used to indicate the type of data the JSON file contains.
- A list of acceptable data types can be found here: http://borderconnect.com/borderconnect/data/data-types.json

Company Key Section: 1.2

Name: companyKey

Full Path: rnsShipment.companyKey

Type: String Value

Is Required?:

Minimum Length:

1

Maximum Length:

30

Sample JSON:

"companyKey": "c-9000-2bcd8ae5954e0c48"

Description:

- Used when connected as a service provider to identify which company account the API Response pertains to. Will exactly match company key for the account.

Cargo Control Number

Name: cargoControlNumber

Full Path: rnsShipment.cargoControlNumber

Type: String Value

Is Required?: Yes
Minimum Length: 8
Maximum Length: 25

Sample JSON:

"cargoControlNumber": "12343545925"

- Starts with carrier's 4 digit canadian carrier code followed by a unique reference number assigned by the carrier.
- Will be alpha-numeric (dash may also appear in first 4 positions if part of carrier code)
- Letters will always be upper case.

Transaction Number

Name: transactionNumber

Full Path: rnsShipment.transactionNumber

Type: String Value

Is Required?: Yes
Minimum Length: 8
Maximum Length: 25

Sample JSON:

"transactionNumber": "734234832"

- In almost all cases, will be exactly 14 digits numeric string, with the first 5 positions representing the customs broker's security code, and the remaining 9 being a unique number assigned by the customs broker.
- When rnsShipment.serviceOptionCode is 612 or 497, the transaction number will instead be identical to the cargo control number. This is because these are CSA clearance options, and there is no customs broker involved to provide a seperate reference for the transaction.

Driver Name Section: 1.5

Name: driverName

Full Path: rnsShipment.driverName

Type: String Value

Is Required?: No
Minimum Length: 2
Maximum Length: 110

Sample JSON:

"driverName": "Avery Franklin Brooks"

Description:

- Provided for ease of reference only, will be the full name of the driver associated with the RNS shipment, if the driver is known at the time of RNS message receipt. This would either be via ACI eManifest or a PARS sequence entered in BorderConnect prior to the receipt of the RNS message from CBSA.

Service Option Section: 1.6

Name: serviceOption

Full Path: rnsShipment.serviceOption

Type: Object Is Required?: No

Sample JSON:

```
"serviceOption": {
    "number": "125",
    "name": "RMD, EDI"
```

- Indicates what type of filing has been done by the customs broker, or in the case of the CSA service options, the carrier.
- e.g. The PARS service options are used for declaring commercial goods prior to their arrival in Canada, and the RMD service options are used for declaring goods that are already in Canada but not yet customs released.
- Service options can be found here: http://borderconnect.com/borderconnect/data/ca/rns/service-option-codes.json

Service Option Number

Name: number

Full Path: rnsShipment.serviceOption.number

Type: String Value

Is Required?: Yes
Minimum Length: 2
Maximum Length: 3

JSON Reference Data: https://borderconnect.com/data/ca/rns/service-option-

codes.json

Sample JSON:

"number": "125"

Description:

- Numeric string. Coded value of the service option.

Service Option Name

Name: name

Full Path: rnsShipment.serviceOption.name

Type: String Value

Is Required?:YesMinimum Length:1Maximum Length:30

Sample JSON:

"name": "RMD, EDI"

Description:

- Plain text description of the service option.

Release Office Section: 1.7

Name: releaseOffice

Full Path: rnsShipment.releaseOffice

Type: Object Is Required?: No

Sample JSON:

```
"releaseOffice": {
    "number": "3434",
    "name": "Petawa"
```

Description:

- Indicates the CBSA port that has control over the current transaction.

Release Office Number

Name: number

Full Path: rnsShipment.releaseOffice.number

Type: String Value

Is Required?: Yes
Minimum Length: 4
Maximum Length: 4

JSON Reference Data: https://borderconnect.com/data/ca/aci/ports.json

Sample JSON:

"number": "3434"

- Exactly 4 numbers matching a CBSA Release Office Port Code
- Port codes can be found here: http://borderconnect.com/borderconnect/data/ca/aci/ports.json
- Indicates the CBSA location where the cargo is or will be released.

Release Office Name

Name: name

Full Path: rnsShipment.releaseOffice.name

Type: String Value

Is Required?:YesMinimum Length:1Maximum Length:50

Sample JSON:

"name": "Petawa"

Description:

- Plain text name of the CBSA Release Office

Name: subLocation

Full Path: rnsShipment.subLocation

Type: Object Is Required?: No

Sample JSON:

```
"subLocation": {
    "code": "3434",
    "name": "Pembroke",
    "address": {
        "addressLine": "142 Oak Lane",
        "city": "Pembroke",
        "stateProvince": "ON",
        "stateProvinceName": "Ontario",
        "country": "CA",
        "countryName": "Canada",
        "postalCode": "N1F4G8"
        },
        "portLocation": {
              "number": "0453",
              "name": "Windsor Ambassador Bridge"
        }
}
```

Name: code

Full Path: rnsShipment.subLocation.code

Type: String Value

Is Required?: Yes

Minimum Length: Maximum Length:

Sample JSON:

"code": "3434"

Name:

Full Path: rns Shipment. subLocation. name

No

String Value Type:

Is Required?: Minimum Length:

Maximum Length:

Sample JSON:

"name": "Pembroke"

Name: address

Full Path: rnsShipment.subLocation.address

Type: Object Is Required?: No

Sample JSON:

```
"addressLine": "142 Oak Lane",
    "city": "Pembroke",
    "stateProvince": "ON",
    "stateProvinceName": "Ontario",
    "country": "CA",
    "countryName": "Canada",
    "postalCode": "N1F4G8"
}
```

Name: addressLine

Full Path: rnsShipment.subLocation.address.addressLine

Yes

Type: String Value

Is Required?: Minimum Length:

Minimum Length: Maximum Length:

Sample JSON:

"addressLine": "142 Oak Lane"

Name: city

Full Path: rnsShipment.subLocation.address.city

Type: String Value

Is Required?: Yes

Minimum Length: Maximum Length:

Sample JSON:

"city": "Pembroke"

Name: stateProvince

Full Path: rnsShipment.subLocation.address.stateProvince

No

Type: String Value

Is Required?:

Minimum Length: Maximum Length:

Sample JSON:

"stateProvince": "ON"

Name: stateProvinceName

Full Path: rnsShipment.subLocation.address.stateProvinceName

No

Type: String Value

Is Required?:
Minimum Length:
Maximum Length:

Sample JSON:

"stateProvinceName": "Ontario"

Name: country

Full Path: rnsShipment.subLocation.address.country

No

Type: String Value

Is Required?:

Minimum Length: Maximum Length:

Sample JSON:

"country": "CA"

Name: countryName

Full Path: rns Shipment. subLocation. address. country Name

No

Type: String Value

Is Required?: Minimum Length:

Maximum Length:

Sample JSON:

"countryName": "Canada"

Name: postalCode

Full Path: rnsShipment.subLocation.address.postalCode

Yes

Type: String Value

Is Required?:

Minimum Length: Maximum Length:

Sample JSON:

"postalCode": "N1F4G8"

Name: portLocation

Full Path: rnsShipment.subLocation.portLocation

Type: Object Is Required?: No

Sample JSON:

```
"portLocation": {
    "number": "0453",
    "name": "Windsor Ambassador Bridge"
```

Name: number

Full Path: rnsShipment.subLocation.portLocation.number

Type: String Value

Is Required?: Yes

Minimum Length: Maximum Length:

Sample JSON:

"number": "0453"

Name: name

Full Path: rnsShipment.subLocation.portLocation.name

Type: String Value

Is Required?: Yes

Minimum Length: Maximum Length:

Sample JSON:

"name": "Windsor Ambassador Bridge"

Container Number Section: 1.9

Name: containerNumber

Full Path: rnsShipment.containerNumber

Type: String Value

Is Required?: No
Minimum Length: 1
Maximum Length: 1584

Sample JSON:

"containerNumber": "3743"

Description:

- Container number(s) associated with the transaction, if applicable. Will be listed in a single string value, separated by a comma and a space. Up to 99 container numbers may be listed, each of may be up to 14 characters long, alphanumeric.

ACI Trip Number

Name: aciTripNumber

Full Path: rnsShipment.aciTripNumber

Type: String Value

Is Required?:

Minimum Length:

8

Maximum Length:

25

Sample JSON:

"aciTripNumber": "43443534545"

- Starts with carrier's 4 digit canadian carrier code followed by a unique reference number.
- Will be alphanumeric (dash also allowed in first 4 positions if part of carrier code), letters will be upper case.
- Represents the trip number of the associated ACI eManifest, if one exists at the time the RNS message is received from CBSA.

RNS Shipment Status

Name: status

Full Path: rnsShipment.status

Type: Object Is Required?: No

Sample JSON:

```
"status": {
    "dateTime": "2014-11-01 01:50:22",
    "releaseCode": {
        "number": "4",
        "shortName": "Released",
        "longName": "Goods Released"
    },
    "deliveryInstructions": "Hey one two three"
}
```

Description:

- Used to convey full information with respect to the current status of the RNS shipment.

Date And Time Section: 1.11.1

Name: dateTime

Full Path: rnsShipment.status.dateTime

Type: String Value

Is Required?: Yes
Minimum Length: 19
Maximum Length: 19

Sample JSON:

"dateTime": "2014-11-01 01:50:22"

- The CBSA processing time that applies to the Status being indicated.
- Will be in format yyyy-mm-dd hh:mm:ss
- e.g. if the Release Code indicates the shipment is "Released", this is the time at which the shipment was released, according to CBSA.

Release Code Section: 1.11.2

Name: releaseCode

Full Path: rnsShipment.status.releaseCode

Type: Object Is Required?: Yes

Sample JSON:

```
"releaseCode": {
   "number": "4",
   "shortName": "Released",
   "longName": "Goods Released"
}
```

- Release codes can be found here:
 - $<\!/span\!>\!http:\!//borderconnect.com/borderconnect/data/ca/aci/release-codes.json$
- Indicates what type of status the RNS shipment is in.

Section: 1.11.2.1

Release Code Number

Name: number

Full Path: rnsShipment.status.releaseCode.number

Type: String Value

Is Required?: Yes
Minimum Length: 1
Maximum Length: 2

JSON Reference Data: https://borderconnect.com/data/ca/aci/release-codes.json

Sample JSON:

"number": "4"

- Numeric string. Coded value for the shipment status.
- e.g. Release Code "4" indicates the goods are released by customs, and the carrier can proceed to deliver them to the consignee in Canada. Release Code "5" indicates that a CBSA examination of the goods is required and arrangements should be made for the inspection.

Section: 1.11.2.2

Release Code Short Name

Name: shortName

Full Path: rnsShipment.status.releaseCode.shortName

Type: String Value

Is Required?:YesMinimum Length:1Maximum Length:35

Sample JSON:

"shortName": "Released"

Description:

- Short version description of the shipment status.

Section: 1.11.2.3

Release Code Long Name

Name: longName

Full Path: rnsShipment.status.releaseCode.longName

Type: String Value

Is Required?:YesMinimum Length:1Maximum Length:100

Sample JSON:

"longName": "Goods Released"

Description:

- Long version description of the shipment status.

Section: 1.11.3

Delivery Instructions

Name: deliveryInstructions

Full Path: rnsShipment.status.deliveryInstructions

Type: String Value

Is Required?: No
Minimum Length: 1
Maximum Length: 140

Sample JSON:

"deliveryInstructions": "Hey one two three"

- Free text field.
- Contains delivery instructions or comments about the shipment entered by the customs broker.
